

Every message the site sends

Ten templates and one free-typed broadcast. For each one: what sets it off, the subject line that lands in the inbox, who is on it, and the words themselves.

FROM PickAShift <pickashift@reliefshifts.com>	TRANSPORT SMTP — app/Config/Email.php, credentials from .env	SENDER send_email(\$to, \$subject, \$body, \$cc, \$bcc)
BODIES email_body('name') → app/Views/emails/name.php		

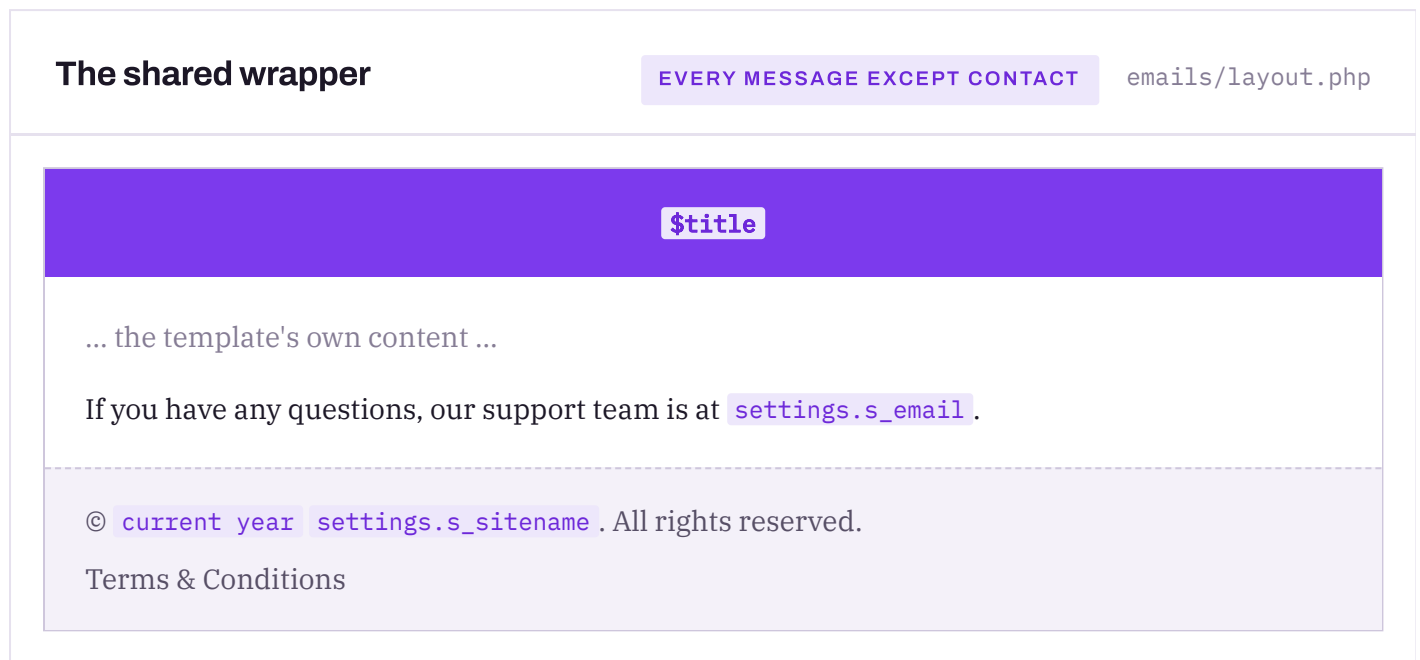

How a message is put together

Every body is a template — none are built as HTML strings in a controller.

`email_body()` renders one and hands `$settings` in for you, so the site name and the support address are always filled. Nine of the ten templates extend `emails/layout.php`, which supplies the violet banner across the top and the two paragraphs at the bottom. Only `contact.php` stands alone as a document of its own.

A plain-text alternative is generated from each body by stripping the tags, so text-only clients get something readable and spam filters see a proper multipart message. A send that fails is logged and stashed in session tempdata under

`email_failures`, so the page that follows can say so rather than pretending it went.

The eleven messages

Ordered below by what triggers them: a visitor using the front site, an administrator pressing something in the back office, the nightly job, or the

command line.

TEMPLATE	SUBJECT	GOES TO	SET OFF BY	OPT-OUT
welcome	Welcome to <i>site</i> ! Your Account is Pending	The new user	Registration form	Type 1
reset-password	Reset Password	The account holder	Forgot-password form	None – transactional
contact	New Contact Us Message	The admin address	Contact form	None
account-approved	Your Account Has Been Approved – Welcome to <i>site</i> !	The user	Admin activates an account	Type 2
shift-posted	Your Shift Has Been Posted on <i>site</i> !	Store owner and/or manager, plus the fixed address	A shift goes live	Type 3
booking-applicant	Congratulations! You Have Been Approved for Shift ID : <i>title</i>	The applicant, agency copied	Admin books an applicant	Type 4
booking-employer	A New Applicant Has Been Approved for Shift ID : <i>title</i>	The employer, agency copied	Admin books an applicant	Type 5
booking-cancelled	Your shift booking has been cancelled : <i>title</i>	The applicant, agency copied	A booking is taken back	None
shift-reminder	Reminder: your shift tomorrow at <i>store</i>	The booked applicant	Nightly job	Type 6
test	Test message from <i>sender name</i>	Whoever you name	php spark email:test	None
no template	Typed by the administrator	A pasted list of addresses	Send Email screen	None

Set off by a visitor

The three anybody can trigger from the public side of the site.

Welcome		VISITOR	emails/welcome.php
SENT WHEN	Somebody completes the registration form, before any admin has looked at the account.		
CODE	app/Controllers/Front.php:701		
TO	The address just registered with		
OPT-OUT	Type 1, “Welcome (on registration)” — guarded like the rest, though at registration the block list is necessarily empty		
SUBJECT Welcome to site name ! Your Account is Pending			
Welcome to site name !			
Hello, first last ! Thank you for registering with site name . Your account is currently under review and will be activated once it is approved. As soon as that happens you will get a confirmation e-mail, and you will be able to sign in with the credentials you chose during registration. We appreciate your patience and look forward to having you as part of our community.			

Password reset

VISITOR

emails/reset-password.php

SENT WHEN The forgot-password form is submitted with an address that has an account.

CODE `app/Controllers/Front.php:141`

TO The account holder

LINK `front/reset_password/{token}` , valid for 10 minutes

OPT-OUT None. A password reset is not optional mail.

SUBJECT Reset Password

Reset your password

Reset your password

We received a request to reset the password on your account. Use the button below to choose a new one.

Choose a new password

The link is valid for `10` minutes. If the button does not work, copy this address into your browser:

`reset link`

If you did not ask for a password reset you can ignore this e-mail — your current password stays as it is.

Contact form		VISITOR	emails/contact.php
SENT WHEN	The Contact Us form on the front site is submitted.		
CODE	app/Controllers/Front.php:1106		
TO	settings.s_email — the site's own admin address		
LAYOUT	The only template that does <i>not</i> extend the shared wrapper. It is a whole document with its own grey table.		
OPT-OUT	None		
SUBJECT New Contact Us Message New Contact Us Message Name: name Email: email Subject: subject Message: message, line breaks kept This message was sent via the Contact Us form on your website.			

Set off by an administrator

Six messages leave the moment somebody in the back office presses save, approve

or send.

Account approved		BACK OFFICE	emails/account-approved.php
SENT WHEN	An admin flips a user from pending to active — from the edit form or the activate button, on employers and applicants alike.		
CODE	Sadmin::sendAccountApprovedEmail(), called at Sadmin.php:2046, 2229, 2581		
TO	The user whose account went live		
OPT-OUT	Type 2, “Account approved”		
SUBJECT Your Account Has Been Approved – Welcome to site name !			
Your account has been approved			
Hello, first last !			
Great news — your account with site name has been approved and is now active. You can sign in using the credentials you provided during registration.			
Sign in			
Enjoy exploring the platform, and welcome to the site name community!			

Shift is live

BACK OFFICE

emails/shift-posted.php

SENT WHEN

A shift becomes Live — either saved as Live outright or approved later.

CODE

`Sadmin::sendShiftPostedEmail()`, called at `Sadmin.php:2750, 2878`

TO

Whichever sides the shift names in `p_email_to` — the store's owner, its manager, both or neither — *plus* the fixed address `info@reliefshifts.com`, which is on every one of these and cannot be unticked.

ADDRESSED TO

The store's owner either way. A manager gets the same message rather than one written for them: this e-mail says a shift is live, and that reads the same to both sides of a store.

OPT-OUT

Type 3, “Shift posted” (employers only). A side that was ticked but is unreachable — no manager on the store, no address, or opted out — is logged, not silently dropped.

SUBJECT Your Shift Has Been Posted on `site name` !

Your shift is now live

Hello, `owner first last` !

Great news — your shift `shift title` has been posted and is now live on our platform.

Applicants can view and apply for it straight away. We will let you know each time a candidate submits an application.

Thank you for choosing `site name` to fill your shift.

Booking confirmed — applicant's copy

BACK OFFICE

emails/booking-applicant.php

SENT WHEN	An admin approves an application, or places an applicant on a shift outright.
CODE	<code>Sadmin::sendBookingEmails()</code> , <code>Sadmin.php:3533</code>
TO	The applicant, with the agency copy address in CC
RATE SHOWN	<code>p_ac_hourly_rate</code> — what the applicant is paid, deliberately not the rate on the employer's copy
ADDRESS SHOWN	The shift's own store, not the employer's login columns. For a multi-store owner those are the head office, and this is the message telling somebody which building to walk into.
OPT-OUT	Type 4, “Booking confirmation (as applicant)”. If the applicant opted out the agency's copy still goes — the opt-out is theirs, not the agency's.

SUBJECT Congratulations! You Have Been Approved for Shift ID : `shift title`

You have been approved for a shift

Hello, `first last` !

We are delighted to tell you that you have been approved for `shift title` at `company name` .

Here are the details:

- Store: `store name` (no. `store number`)
- Where to find it: `location label` — *only if the store has one*
- Store address: `address, city, province, postcode`
- Store phone: `phone` — *only if set*
- Shift requested for: `role`
- Shift date: `date`
- Shift time: `time`
- Rate: CAD\$ `applicant rate` /hour
- Software: `skills`
- Services: `services`
- Message from the agency: `approval comment` — *only if the admin typed one*

[Get directions to this store](#) — *the store's pasted map pin, or a search for the address above*

We wish you all the best for the shift.

IF THE SHIFT HAS NO STORE ATTACHED, THE FIRST LINES FALL BACK TO

- Store no.: `employer licence no.`
- Store address: `employer address`

Booking confirmed — employer's copy

BACK OFFICE

emails/booking-employer.php

SENT WHEN The same moment as the applicant's copy — the second half of one booking.

CODE `Sadmin::sendBookingEmails()` , `Sadmin.php:3559`

TO The employer, with the agency copy address in CC

RATE SHOWN `p_hourly_rate` — what the employer is billed

OPT-OUT Type 5, “Booking confirmation (as employer)”. Agency copy still goes.

SUBJECT A New Applicant Has Been Approved for Shift ID : `shift title`

An applicant has been approved for your shift

Hello, `employer first last` !

An applicant has been approved for your shift `shift title` .

Here are their details:

- Store: `store name` (no. `store number`) — *which branch, for a chain*
- Applicant name: `first last`
- Licence no.: `licence no.`
- Licence province: `province`
- Shift requested for: `role`
- Shift date: `date`
- Shift time: `time`
- Rate: CAD\$ `employer rate` /hour
- Software: `skills`
- Services: `services`

We hope the shift goes well.

Booking cancelled

BACK OFFICE

emails/booking-cancelled.php

SENT WHEN A booking is taken back off an applicant from the shift form: swapped for somebody else, cleared, or the shift itself made inactive.

CODE Sadmin::sendCancellationEmail() , Sadmin.php:3371

TO The applicant who lost the shift, with the agency copied

NO COMMENT It carries no message from the administrator on purpose. The box on that form is addressed to whoever is *being* booked; forwarding it here would be telling somebody something meant for someone else.

OPT-OUT None. "Do not attend" is not optional mail.

SUBJECT Your shift booking has been cancelled : shift title

Your shift booking has been cancelled

Hello, first last!

We are writing to let you know that your booking for shift title at company name has been cancelled. **Please do not attend this shift.**

The booking was for:

- Store: store name (no. store number)
- Shift date: date
- Shift time: time
- Role: role

You are free to apply for other shifts on the site as usual, and we will be in touch as more come up. If you think this is a mistake, or you would like to know more, please reply to this e-mail or call us on settings.s_contactno .

We are sorry for the inconvenience.

Ad-hoc broadcast

BACK OFFICE

no template

SENT WHEN

An admin fills in the Send Email screen at `/sadmin/send_email` and presses send.

CODE

```
Sadmin::send(), Sadmin.php:3645
```

TO

A comma-separated list typed into the form. Everyone on it is a visible recipient, so they all see each other.

BODY

Whatever the admin types — no wrapper, no banner, no footer. This is the one message on the site with no template behind it.

It goes through the site's own mail configuration. The third party's SMTP credentials that used to sit hard-coded here have been removed.

Sent on a schedule

One message goes out without anybody pressing anything.

Your shift is tomorrow

NIGHTLY JOB

emails/shift-reminder.php

SENT WHEN	The day before a booked shift, once per booking.
RUN BY	<code>php spark shifts:remind</code> , or <code>GET /cron/remind_shifts</code> on hosts without a command line. Safe to hit more than once a day – <code>sj_reminder_sent_at</code> stops repeats.
CODE	<code>send_shift_reminders()</code> , <code>app/Helpers/common_helper.php:1543</code>
TO	The booked applicant
OPT-OUT	Type 6, “Day-before shift reminder”

SUBJECT Reminder: your shift tomorrow at `store name, or company name`

Your shift is tomorrow

Hello, `first last`!

A reminder that you are booked for a shift **tomorrow**, `Friday 21 August 2026`.

- Store: `store name` (no. `store number`)
- Where to find it: `location label` – *only if set*
- Address: `address, city, province, postcode`
- Store phone: `phone` – *only if set*
- Shift time: `time`
- Rate: CAD\$ `applicant rate` /hour
- Role: `role`
- Software: `skills`

[Get directions to this store](#)

If you can no longer attend, tell us as soon as you can so the pharmacy can be covered.

IF THE SHIFT HAS NO STORE ATTACHED, THE FIRST LINES FALL BACK TO

- Store: `company name` (no. `employer licence no.`)
- Address: `employer address`

Sent from the command line

Delivery test

CLIemails/test.php

SENT WHEN

You run `php spark email:test you@example.com`.

CODE

`app/Commands/TestEmail.php:46`

WHY THE WRAPPER

It renders through the same layout as every real message, so a delivery test also proves the templates render.

SUBJECT Test message from `sender name`

Delivery test

Delivery test

This message was sent at `timestamp` through `smtp host:port`.

If it reached you, SMTP delivery from this server is working. If it landed in the junk folder, the sending domain still needs SPF and DKIM records.

To read a body without sending it: `php spark email:preview <template>`
(`app/Commands/PreviewEmail.php`) prints any of these templates filled with sample data.

Who can turn what off

Six of the eleven are optional. Each has a numeric code; a user's blocked codes live in `users.u_email_blocked` as a comma-separated list, and every send site asks `userAllowsEmail()` before going ahead. The list is defined in

`app/Config/AppSettings.php:222` , and Manage Email only offers an account the types its own side can actually receive.

CODE	LABEL ON THE MANAGE EMAIL SCREEN	TEMPLATE	OFFERED TO
1	Welcome (on registration)	<code>welcome</code>	Both
2	Account approved	<code>account-approved</code>	Both
3	Shift posted (your shift is live)	<code>shift-posted</code>	Employers
4	Booking confirmation (as applicant)	<code>booking-applicant</code>	Applicants
5	Booking confirmation (as employer)	<code>booking-employer</code>	Employers
6	Day-before shift reminder	<code>shift-reminder</code>	Applicants

The other five have no switch on purpose: the password reset, the cancellation, the contact form, the delivery test, and the ad-hoc broadcast.

The three fixed addresses

WHAT	DEFAULT	WHERE IT IS SET	ON WHICH MESSAGES
Sender	<code>pickashift@reliefshifts.com</code>	<code>AppSettings::\$mailFromEmail</code>	Every message
Agency copy	<code>info@reliefshifts.com</code>	<code>settings.s_agency_copy_email</code> , editable at <code>/sadmin/settings</code>	Both booking halves and the cancellation, in CC
Shift fallback	<code>info@reliefshifts.com</code>	<code>AppSettings::\$shiftEmailFallback</code>	Every “shift is live”, whoever else is on it — so a shift never goes live unannounced

Read off the code in `app/Views/emails/` , `app/Controllers/` and `app/Helpers/common_helper.php` on 20 August 2026. Copy is shown with its variables marked, and lines that only appear in some sends are noted as such.
